

Pharmaceutical Technology welcomes manuscripts about subjects pertinent to all aspects of applied research and development, scale-up, and manufacturing technologies for the pharmaceutical industry. Topics include regulatory affairs, contract services, drug delivery systems, ingredients, processing, packaging, and validation. Although manuscripts are reviewed by members of the magazine's Editorial Advisory Board, they must first be submitted to the editorial director.

Before submitting the completed work, authors are urged to review manuscripts for clarity of expression, details of grammar, and typographical accuracy. Acronyms and abbreviations used in manuscripts should be defined. The author is responsible for all statements in his or her work. All accepted manuscripts are subject to copy editing. Although rejected manuscripts are returned to the author, *Pharmaceutical Technology* is not responsible for the safety of manuscripts, artwork, or photographs.

Manuscripts are reviewed with the understanding that they have not been published previously and are not under consideration for publication elsewhere, including on the Internet. The author will be required to sign a license agreement before a manuscript is accepted for publication. If any illustrations or figures in a manuscript have been published elsewhere, the author is responsible for obtaining permission to republish.

Manuscripts may be submitted in the following ways:

- via e-mail to Kaylynn Chiarello, assistant editor (kchiarello@advanstar.com)
- via postal mail on a ZIP disk or CD to the address at the end of this page.

Preparing the electronic file. The text file should be formatted in text-only code or Microsoft Word. Disks should be labeled with the file name and the name of the word processing system in addition to any graphics and/or spreadsheet programs used. Do not use any special text format-

ting codes or control characters. Strip out any special-character codes and font-change codes.

Please include tables and figure captions in the electronic file at the end of the article. Equations, graphs, and any other material that requires special characters or formatting can be included electronically, but a printout also must be included.

Authors should furnish two hard copies of the manuscript. Each component of the manuscript should begin on a separate page. These components include the title page (with author's name, title, company affiliation, address, phone, fax, and e-mail), a synopsis or abstract, the first page of the text, references, tables, and legends for illustrations. Titles should be short and specific and should accurately reflect the content of the article. Beginning with the first page of the text, each page of the hard copy should be numbered consecutively. A length of 12–20 pages (double-spaced copy) is preferred.

Illustrations. Photographs, line drawings, and other illustrations may be in color or black and white and must be referred to in the text in consecutive order: Figure 1, Figure 2, and so forth. All illustrations that do not increase the reader's understanding of the text should be omitted. However, a four-color photograph may be used on the opening page of the article. Color photos that an author wishes to submit for consideration should be enclosed with the article and should be in the form of a transparency or slide. TIFF (Mac), TIF (PC), JPEG, and EPS/EPST (Mac or PC) files also are acceptable but must have a minimum resolution of 300 dpi.

Figures and tables. Line drawings, graphs, photos, and charts must be identified with the figure number and principal author's name. Figure legends should be collected on a separate page, each identified by its proper number. All symbols, acronyms, and abbreviations used in figures and tables should be explained.

In the text, tables should be referred to by roman numerals in consecutive order: Table I, Table II, and so forth.

References. Literature citations in the text should be numbered consecutively and indicated by arabic numerals in parentheses. References should be grouped at the end of the manuscript and arranged

in order of their appearance in the text — not alphabetically. The following information should be included in references:

- names of all authors (and editors of books)
- complete title of the article (or book)
- name of publication, publisher, and publisher's location (for books)
- identifying information such as "paper presented at," where applicable
- volume and issue numbers (for journals)
- year of publication
- first and last page numbers of the article, chapter, or section cited.

The following are examples of specific forms:

Chapter in a book:

1. E.F. Fiese and T.A. Hagen, "Preformulation," in *Theory and Practice of Industrial Pharmacy*, L. Lachman, H.A. Lieberman, and J.L. Kanig, Eds. (Lea & Febiger, Philadelphia, 3d ed., 1986), pp. 171–194.

Article in a journal:

2. G.M. Golden, J.E. McKie, and R.O. Potts, "Role of Stratum Corneum Lipid Fluidity in Transdermal Drug Flux," *J. Pharm. Sci.* **76** (1), 25–28 (1987).

Published conference proceedings:

3. J.B. Dressman, "Predicting Release Kinetics from Enteric-Coated Dosage Forms," in *Proceedings of Pharm Tech Conference '88* (Aster Publishing Corporation, Eugene, OR, 1985), pp. 239–250.

Oral presentations:

4. B.L. Hawkins, A. Baxter, and G.E. Masters, "NMR Preview: A Look to the 1990s," paper presented at the 25th Experimental NMR Conference, Wilmington, Delaware, 19–20 February 1984.

Government publications:

5. *Code of Federal Regulations, Title 21, Food and Drugs* (General Services Administration, Washington, DC, 1 April 1973), Part 121, pp. 270–290.
6. FDA, "Human and Veterinary Drugs, Good Manufacturing Practices and Proposed Exemptions for Certain OTC Products," *Federal Register* **43** (190), 45013–45089 (29 September 1978).

If you have questions about the submission of your manuscript, please contact the editorial director. Send manuscripts to
